RFP- Website Redesign and ADA Compliance

Addendum #8_12.22.2025

1. **Project Budget Range**

   Is there an anticipated budget range or not-to-exceed amount for the website redesign and ADA accessibility compliance implementation? OHPA welcomes vendor's recommendations and proposed costs.

2. **Website Hosting Environment**

   Could you please clarify where the redesigned website is expected to be hosted?

   - Is OHPA currently hosting the website internally, through a third-party provider, or via a government-managed environment? Currently through a third party.
   - Should the selected vendor assume responsibility for hosting as part of the proposal, or should the solution be designed to deploy within an existing hosting environment? OHPA is open to vendor's recommendation. The main goal is to follow ADA compliance.

3. **Ongoing Maintenance & Post-Launch Support**

   Following website launch and initial compliance certification:

   - Does OHPA anticipate ongoing vendor-provided maintenance and accessibility monitoring services? OHPA is open to vendor's recommendation.
   - If so, should proposers include optional or required pricing for post-launch support, content updates, accessibility audits, and compliance reporting? Yes for complete consideration.
   - Is there an estimated annual budget or preferred contract structure for ongoing maintenance and accessibility governance? OHPA will follow the guidance of its legal counsel regarding all contractual matters.

4. **Document Remediation Volume**

   Is there an estimated number or total page count of public-facing documents that will require accessibility remediation as part of the initial project scope? OHPA plans to limit its public-facing contents to two (2) pages.
